

Some of us could use a little boost.

If these two little balls start to seem a bit flat,
you can reinflate them with a bike pump.

Moisten the needle first and be oh-so-careful...
if you overinflate them, they'll be too full to
snuggle up with their big mama ball.
And no mama wants that!

The other four balls, including the mama ball,
are **NOT** inflatable.

Hug, squish, and roll them all you want,
but please don't try to blow them up.
