

B.

Eyelightr™

2 TO 8 YEARS

FUNCTIONS. Works on battery power or kid power.

1. Press the top button once to turn on the white light. (This uses battery power.)
2. Roll to bring on multicolored disco lights. (This uses kid power.)

Keep pressing to get different light effects in this order:

- ON/solid white
- Flashing white
- Solid blue
- Flashing blue
- Solid green
- Flashing green
- Solid magenta
- Flashing magenta
- OFF

Hold top button for 2 seconds to turn off

The eyes light up whenever you're rolling backward, forward or pumping back and forth. You do need a battery installed for lights to shine, but if you never push the "ON" button it could be years before you have to replace it, and it would take 2000 hours and 83 consecutive days of rolling to wear out the LED bulbs and then you'd be in the Guinness World Records™ book and probably need an agent.

If you forget to shut it off
kitty goes to sleep. Good kitty!

DON'T...

- Don't put the Eyelightr near any heat source or expose it to prolonged sunlight.
- Don't get the Eyelightr wet or immerse it in water.
- Don't stop being you. Nobody else could possibly fill the position.
